

ART 4.1.3.3.3 Provide Petroleum Quality Assurance and Quality Surveillance

Quality assurance is performed by the government in determining requirements and specifications for petroleum products and related services. Quality surveillance includes measures used to determine and maintain the quality of government-owned petroleum products to ensure that such products are suitable for their intended use. Quality surveillance ensures that products meet quality standards after acceptance from the contractor as well as after transfer between government agencies or issue to users. (FM 10-67-2) (CASCOM)
