**Distribution Restriction:** Approved for public release; distribution is unlimited.

**Destruction Notice:** None

**Foreign Disclosure: FD1** - This training product has been reviewed by the training developers in coordination with the Fort Leavenworth, KS foreign disclosure officer. This training product can be used to instruct international military students from all approved countries without restrictions.

**Condition:** The staff officer's unit publishes an operations plan, or warning, operations, or fragmentary order, and is conducting operations and executing the operations process. The staff officer's unit establishes communications with subordinate and adjacent units and higher headquarters. The mission command system is operational and processing information. Some iterations of this task should be performed in MOPP 4.

**Standard:** The staff officer performs information collection by synchronizing and integrating the planning and employment of information collection assets. The staff officer monitors and assesses the execution of the information collection plan by focusing the collection, processing, analysis, and intelligence products on answering the commanders critical information requirements and the staffs information requirements. The staff officer performs all collection activities in accordance with the commanders intent, orders from higher headquarters, and standard operating procedures.

**Special Condition:** None

**Safety Risk:** Low

**MOPP 4:** Sometimes

<b>Task Statements</b>
------------------------

**Cue:** None

**DANGER**

Leaders have an inherent responsibility to conduct Risk Management to ensure the safety of all Soldiers and promote mission accomplishment.

**WARNING**

Risk Management is the Army's primary decision-making process to identify hazards, reduce risk, and prevent both accidental and tactical loss. All Soldiers have the responsibility to learn and understand the risks associated with this task.

**CAUTION**

Identifying hazards and controlling risks across the full spectrum of Army functions, operations, and activities is the responsibility of all Soldiers.

**Remarks:** None

**Notes:** The term 'staff officer' refers to the unit Chief of Staff (CoS), Executive Officer (XO), Deputy Commanding Officer (DCO), and/or another designated officer as directed by the commander.

### Performance Steps

1. The staff officer directs the staff to perform information collection planning during the Military Decision Making Process (MDMP) (150-IPO-0003):

a. The staff officer directs the staff to conduct the following activities upon receipt of the mission from higher and guidance from the commander.

- (1) Gather the tools needed for MDMP to include the most current intelligence estimate and updated staff running estimates.
- (2) Assess the time needed by subordinate units for information collection planning, preparation, and execution.
- (3) Review the commander's initial information collection guidance.
- (4) Coordinate the intelligence tasks.
- (5) Coordinate the requests for information (RFI) to higher headquarters (HQ).
- (6) Verify access to on-going/existing information collection activities and joint intelligence surveillance and reconnaissance
- (7) Coordinate initial information collection tasks for incorporation into Warning Order # 1.

b. The staff officer monitors the staff conducting the following activities during the mission analysis step of MDMP.

- (1) Extract information collection tasks and constraints, such as limits of reconnaissance, from the higher HQ order.
- (2) Confirm availability and allocation of information collection assets from the higher HQ order/plan.
- (3) Use intelligence preparation of the battlefield products:
  - (a) Identify information gaps that can be answered by existing collection activities, intelligence reach, or RFIs to higher echelons.
  - (b) Identify information gaps that cannot be answered by existing collection activities, intelligence reach, or RFIs to higher echelons.
  - (c) Identify threat considerations that may affect information collection planning.
  - (d) Identify terrain effects that benefit, constrain, or limit information collection asset capabilities.
  - (e) Identify weather effects that benefit, constrain, or negatively influence information collection asset capabilities.
  - (f) Identify civil considerations that may affect information collection planning.
- (4) Develop initial information collection requirements based on identified information gaps.
- (5) Identify specified, implied, and essential information collection tasks:
  - (a) Identify specified information collection tasks directed towards subordinate units, systems, sensors, and Soldiers.

(b) Identify implied information collection tasks to determine sensor or system collection initialization.

(c) Identify essential information collection tasks that focus the information collection effort.

(6) Review all available collection assets that can be used to satisfy the information collection requirements.

(a) Determine from the higher HQ order those assets attached or under operational control of the unit.

(b) Determine from the higher HQ order those assets available from higher echelons or belonging to adjacent units.

(c) Determine from the higher HQ order the specified temporary or permanent operating locations for the assets and the air tasking order details for aerial assets.

(d) Evaluate available collection assets using the following criteria:

\_1\_ Availability.

\_2\_ Capability:

\_a\_ Range.

\_b\_ Day and night effectiveness.

\_c\_ Technical characteristics.

\_d\_ Reporting timeliness.

\_e\_ Geolocation accuracy.

\_f\_ Durability.

\_g\_ Threat activity.

\_h\_ Sustainability.

\_i\_ Vulnerability.

\_j\_ Performance history.

(7) Determine legal, political, operational, and rules of engagement constraints which might constrain information collection activities.

(8) Identifies critical facts and assumptions pertinent to information collection planning.

(9) Assess the protection requirements of and risks to information collection assets versus the asset's abilities to collect and collection effectiveness.

(10) Determine, from the initial information collection requirements, the initial recommended commander's critical information requirements (CCIR) and essential elements of friendly information.

(11) Develop the initial information collection plan to include:

(a) Requirements for collection assets in follow-on missions.

(b) Risk the commander is willing to accept if information collection missions are begun before the information collection plan is fully integrated with the scheme of maneuver.

(c) Insertion and extraction methods for reconnaissance, security, surveillance, and intelligence units.

(d) Contingencies for inclement weather to ensure the coverage of key named areas of interest (NAI)/targeted areas of interest (TAI).

(e) Communications plan for the transmission of reports from assets to tactical operations centers.

(f) Inclusion of collection asset locations and movements into the fire support plan.

(g) Reconnaissance handover, with higher or subordinate units.

(h) Information collection asset sustainment support.

(i) Legal support requirements for the information collection plan.

(12) Develop RFIs and requests for collection or support:

(a) Submit RFIs to higher HQ based on information requirements.

(b) Validate subordinate unit RFIs:

\_1\_ Determine whether the RFI can be satisfied at that echelon.

\_2\_ Pass on to higher HQ those subordinate unit RFIs that cannot be satisfied at that echelon.

(c) Notify subordinate units on the status of their RFIs, to include:

\_1\_ Whether the RFI was accepted for action.

\_2\_ Whether the RFI was passed to another organization for action.

\_3\_ Whether the RFI was returned without action (invalid or impracticable RFI).

\_4\_ Whether the RFI was closed (satisfied).

(d) Notify higher HQ on the status of that echelon's RFIs on whether RFIs are still valid or have been overcome by events (closed).

(13) Develop information production requirements that provide timely and relevant intelligence and products to the commander, staff, and subordinate units.

c. The staff officer directs the staff to complete the following actions during the course of action (COA) development step of MDMP.

(1) Integrate information collection considerations for each friendly COA.

(2) Coordinate the information collection considerations to support each COA to include the following relationship:

- (a) Collection assets to other friendly forces.
- (b) Collection assets to the terrain.
- (c) Collection assets to the weather.
- (d) Collection assets to the threat.

(3) Develop NAIs and TAIs for each friendly COA that include:

- (a) An information collection asset mix.
- (b) Redundancy.
- (c) Cue to offset the capabilities of the various collection assets.

(4) Refine the initial CCIRs for each friendly COA.

d. The staff officer monitors the staff completing the following actions during the COA analysis (wargaming) step of MDMP.

- (1) Record the results of the COA analysis with regards to collection assets.
- (2) Refine collection asset taskings based on the COA analysis results.

e. The staff officer directs the staff to integrate specific information collection tasks by directing units to collect and report during the operations process of MDMP.

2. The staff officer monitors the staff during the execution of the information collection plan:

- a. Correlate reports to information requirements, especially CCIR.
- b. Screen reports to determine whether the collection task has been satisfied using the following criteria:

(1) Was the information relevant to the tasked collection task, and if not, determines if the information was relevant to other information requirements?

(2) Were the reports complete?

(3) Did the reports meet the Latest Time Information of Value (LTIOV) as established in the original task?

(4) Did the reporting collection asset or other assets take advantage of the new information to increase effectiveness and efficiency of the information collection plan?

(5) Did the reporting collection asset or other assets take advantage of the new information to increase effectiveness and efficiency by cueing other assets?

c. Provides feedback to all collection asset managers and to staff Warfighting Function (WfF) sections on their mission effectiveness.

d. The staff officer directs the staff to update the information collection plan:

(1) Synchronize information collection activities to operations.

(2) Cue assets to other collection requirements.

(3) Eliminate satisfied collection requirements.

(4) Develop and add new collection requirements.

(5) Re-task assets, as required.

(6) Prepare to transition to the next operation.

3. The staff officer assesses information collection activities:

a. Monitors and evaluates the current situation, to include the threat situation and progress of the operation.

b. Determines if the commander is receiving relevant information before the LTIOV.

c. Assesses the current running estimate based on information collection reporting to determine the running estimate's accuracy and relevancy.

d. Conducts an after action review to determine:

(1) Which requirements were answered and which ones were not.

(2) The accuracy and effectiveness of collection assets.

(Asterisks indicates a leader performance step.)

**Evaluation Guidance:** Score the Soldier GO if he/she passes all performance measures. Score the Soldier NO-GO if Soldier fails any performance measure. If the Soldier scores NO-GO, show the Soldier why he/she failed and show the Soldier how to perform the measure correctly.

**Evaluation Preparation:** Brief the Soldier: Explain expectations to the Soldier by reviewing the task standards. Stress to the Soldier the importance of observing all cautions and warnings to avoid injury to personnel and, if applicable, damage to equipment.

**Environment:** Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to the current Environmental Considerations manual and the current GTA Environmental-related Risk Assessment card. Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to FM 3-34.5 Environmental Considerations and GTA 05-08-002 ENVIRONMENTAL-RELATED RISK ASSESSMENT.

**Safety:** In a training environment, leaders must perform a risk assessment in accordance with ATP 5-19, Risk Management. Leaders will complete the current Deliberate Risk Assessment Worksheet in accordance with the TRADOC Safety Officer during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW FM 3-11.4, Multiservice Tactics, Techniques, and Procedures for Nuclear, Biological, and Chemical (NBC) Protection, FM 3-11.5, Multiservice Tactics, Techniques, and Procedures for Chemical, Biological, Radiological, and Nuclear Decontamination.
