

ART 6.12 Provide Explosive Ordnance Disposal Protection Support

Eliminate or reduce the effects of unexploded explosive ordnance (UXO), improvised explosive devices (IEDs), and CBRN hazards to protect the commander's combat power. Explosive ordnance hazards limit battlefield mobility, deny use of critical assets, and threaten to reduce the commander's combat power significantly. Neutralize domestic or foreign conventional, chemical, biological, and nuclear munitions; enhanced explosive devices; and IEDs that present a threat to civilian facilities, materiel, and personnel, regardless of location. The Departments of Justice, State, and Energy may receive this support per current agreements and directives. (FM 3-34.214) (CASCOM)

Note: ART 6.12.8.6 includes conducting bomb and sabotage device recognition and safety precaution training. ART 6.12.8.7 includes providing explosive ordnance disposal (EOD) support to the U.S. Secret Service, Department of State, and the Department of Defense to protect the President and other designated persons.

Tasks identified in ART 6.12 are tasks that can be provided in support of stability operations as well as in civil support operations.
