

Summary Report for Individual Task
011-228-2471
Perform Target Handover
Status: Approved

Distribution Restriction: Approved for public release; distribution is unlimited.

Destruction Notice: None

Foreign Disclosure: FD6 - This product/publication has been reviewed by the product developers in coordination with the Fort Rucker foreign disclosure authority. This product is releasable to students from foreign countries on a case-by-case basis.

Condition: In an OH-58A/C or TH-67 helicopter or in a classroom environment. This task should not be trained in MOPP 4.

- Standard:**
1. Utilize the five elements of a target handover.
 2. Utilize COMM procedures that will best accomplish the mission.
 3. If necessary, perform security for the engaging unit.

Special Condition: None

Safety Risk: Medium

MOPP 4: Never

Notes: None

Performance Steps

1. Crew actions. Crew actions/procedures. A target handover is a means to positively provide the warning of a target, the identity of the target, the location of the target and if necessary, engagement of a target to a wingman, an attack helicopter or a ground unit, using the following elements:

- a. Alert and Target Description. This alerts the receiving element to the presence of and a description of the target.
- b. Target Location. This provides the receiving element with the target location. Location may be a grid coordinate, a direction and distance, a laser spot, a prominent manmade feature or a prominent terrain feature.
- c. Method of Engagement/Attack. This provides the receiving element with a planned scheme of maneuver or fire distribution plan.
- d. Execution. This provides the receiving element the situational awareness needed to assess the engagement technique to utilize to service the target (i.e., At My Command, Heading 270°, Running Fire, HVR Fire, Diving Fire, etc).
- e. Post Engagement/Attack Actions. This provides the receiving element a plan for further action. There may be a need to re-attack the target or exit the engagement area.

2. Procedures. The five elements of the target handover format should be used when possible. In a situation requiring immediate suppressive fire from a wingman or supporting aircraft, the minimum information required is:

- a. Target description.
- b. Direction from the aircraft being engaged (magnetic azimuth or clock position).
- c. Range from the aircraft being engaged.

(Asterisks indicates a leader performance step.)

Evaluation Guidance:

Evaluation may be conducted in the aircraft or academically.

Evaluation Preparation:

Training may be conducted in the aircraft or academically.

PERFORMANCE MEASURES	GO	NO-GO	N/A
1. Utilized the five elements of a target handover.			
2. Utilized COMM procedures that will best accomplish the mission.			
3. If necessary, performed security for the engaging unit.

Environment: Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to FM 3-34.5 Environmental Considerations and GTA 05-08-002 ENVIRONMENTAL-RELATED RISK ASSESSMENT.

Safety: In a training environment, leaders must perform a risk assessment in accordance with ATP 5-19, Risk Management. Leaders will complete the current Deliberate Risk Assessment Worksheet in accordance with the TRADOC Safety Officer during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW FM 3-11.4, Multiservice Tactics, Techniques, and Procedures for Nuclear, Biological, and Chemical (NBC) Protection, FM 3-11.5, Multiservice Tactics, Techniques, and Procedures for Chemical, Biological, Radiological, and Nuclear Decontamination.
