Warfighter Training Support Package (WTSP)

Manage Theater Gateway

WTSP Information Document

Condition: The sustainment brigade is deployed to an operational theater to provide sustainment to designated forces within a specified area. The supported commands operations order (OPORD)/deployment order directs the sustainment brigade to provide/coordinate for sustainment to specified forces during the deployment on an area basis. Support operations elements have staff responsibilities to supervise personnel accountability support activities required by deploying units/elements. The commander issues planning guidance for management of the Theater Gateway (TG) Personnel Accountability Team (PAT) to be provided to units within the specified area to facilitate their mission accomplishment. Unit standard operating procedures (SOPs) are available in hard copy and/or digital formats. The section has appropriate connectivity to both NIPRNET and SIPRNET systems and access to all necessary automated personnel systems. Technical guidance is received from the Human Resources Sustainment Center (HRSC) and Human Resources Operations Branch (HROB), as appropriate. Communications are established with subordinate and adjacent units, and higher headquarters. Mission command networks and systems are operational and passing information in accordance with Tactical Standing Operating Procedures. Additional units to be assigned to the geographic combatant commander (GCC) are scheduled to begin movement into the theater. Aerial and sea ports are established by logistical elements. Initial task organizations to establish lodgment are identified. Personnel and strength related data for both units and individuals entering, transiting, or departing the area of operations will be gathered by the TG PAT for establishing and maintaining the theater database. Minimum essential personnel services will be provided as required. On completion of the theater opening Personnel Accountability (PA) mission, the TG PAT will transition to theater distribution/sustainment mission. Threat capabilities include information gathering, hostile force sympathizers, and terrorist activities in a chemical, biological, radiological, nuclear and high yield explosives (CBRNE) environment. Some iterations of this task should be performed in MOPPA.

Standard: Complete plans and coordination for the reception, replacement, and redeployment of units before the unit flow begins. Initiate gateway personnel accountability operations on entry and expand to meet full personnel flow. Establish communication link for database entries. Coordinate with logistical elements for provision of billets and messing, as required. Coordinate transportation for onward or retrograde movement of individuals and/or units. Transition to theater distribution mission on order.

Tasks

Name	Type	
WTSP : Manage Theater Gateway (2)		
Collective Task : Manage Theater Gateway Personnel Accountability Teams (1)		
Manage Theater Gateway Personnel Accountability Teams		
Collective Task : Plan Establishment of Theater Gateway Personnel Accountability Team (TG PAT) (1)
