

Summary Report for Individual Task
441-40A-1014
Configure Organic Tactical Operations Center Network (TOCNET)
Status: Approved

DISTRIBUTION RESTRICTION: Approved for public release; distribution is unlimited.

DESTRUCTION NOTICE: None

Condition: Given a requirement or command from a supervisor, tactical operations center (TOC), all TOC network (TOCNET) hardware, software, power supply, and cables. This task should not be trained in MOPP.

Standard: Configure organic tactical operations center network (TOCNET) to achieve mission requirements within the commander's timeline IAW the specific guidance provided by local standard operating procedures (SOP).

Special Condition: None

Safety Level: Low

MOPP: Never

Task Statements

Cue: Given a requirement or command from a supervisor.

DANGER

None

WARNING

None

CAUTION

None

Remarks: None

Notes: All required Air Defense specific references will be provided by local Air Defense Command.

Performance Steps

1. Ensure all necessary equipment is present.
2. Verify the MCSU is functional.
3. Check that the Windows Laptop has Java and the TOCNET Configuration Software loaded.
4. Establish TOCNET operational requirements have been identified.
5. Determine that the mcsu.ini file has been created with the configuration manager software and saved.
6. Verify the Windows Laptop is connected to the MCSU and Hyper Terminal software is communicating with the MCSU.
7. Ensure mcsu.ini file has been transferred to the MCSU and Rebooted.
8. Connect the Windows Laptop to the MCSU via the Network.
9. Verify the Soft CAU software is installed on the Laptop and configured properly.
10. Ensure the Soft CAU software is functional.
11. Check that the Soft CAU has all assigned assets listed.
12. Stow the Windows Laptop and MCSU in accordance With Unit SOP.

(Asterisks indicates a leader performance step.)

Evaluation Preparation: Set Up: Ensure that all information, references, and equipment required to perform the task are available. Use the performance measures and the references to score the Soldier's performance.
 Brief the Soldier: Tell the Soldier what he is required to IAW the task conditions and standards.

PERFORMANCE MEASURES	GO	NO-GO	N/A
1. Ensured all necessary equipment was present.			
2. Verified the MCSU was functional.			
3. Checked the Windows Laptop had Java and the TOCNET Configuration Software was loaded.			
4. Established TOCNET operational requirements had been identified.			
5. Determined that the mcsu.ini file had been created with the configuration manager software and saved.			
6. Verified the Windows Laptop was connected to the MCSU and Hyper Terminal software was communicating with the MCSU.			
7. Ensured mcsu.ini file had been transferred to the MCSU and Rebooted.			
8. Connected the Windows Laptop to the MCSU via the Network.			
9. Verified the Soft CAU software was installed on the Laptop and configured properly.			
10. Ensured the Soft CAU software was functional.			
11. Checked that the Soft CAU had all assigned assets listed.			
12. Ensured the Windows Laptop and MCSU were stowed in accordance With the Unit SOP.

Environment: Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to FM 3-34.5 Environmental Considerations and GTA 05-08-002 ENVIRONMENTAL-RELATED RISK ASSESSMENT.

Safety: In a training environment, leaders must perform a risk assessment in accordance with FM 5-19, Composite Risk Management. Leaders will complete a DA Form 7566 COMPOSITE RISK MANAGEMENT WORKSHEET during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW FM 3-11.4, NBC Protection, FM 3-11.5, CBRN Decontamination. Everyone is responsible for safety. A thorough risk assessment must be completed prior to every mission or operation. Adhere to all WARNING and CAUTIONS listed in the equipment technical manual applicable to this procedure(s). Failure to comply may result in injury to personnel or damage to the equipment. Use common safety precautions. Remove all personnel jewelry to prevent injuries.
