

## ART 6.1.7.1 Perform Asset Management

Units manage assets that support the Ballistic Missile Defense System. Soldiers monitor and manage changes to assets to support ballistic missile defense operations necessary to respond operationally and tactically. Soldiers identify and minimize to the commander any degrading effects of changes on readiness and maintain directed readiness condition. Soldiers are familiar with the system element's (to include supporting sensors) capabilities and limitations so they can adjust the system configuration to ensure the optimal defense. They assess preplanned maintenance, test, and exercise requests to modify the system configuration. Unit commanders recommend approval or disapproval of requested modification through proper channels for combatant commander. Soldiers assess real-time (unplanned) system element outage impact on the ballistic missile defense mission. Units make appropriate changes to the Ballistic Missile Defense System health and status or operational capability as required. They advise the combatant commander in determining the Ballistic Missile Defense System capability. Decide or direct relevant information to the right person, at the right time, in a usable format to facilitate situational understanding and decision making. (FM 3-27.10) (USASMDC)

NO.	Scale	Measure
01	Yes/No	Unit assessed preplanned maintenance, test, and exercise requests to modify system configuration (assets), determined impact on the mission, and made decision.
02	Yes/No	Unit assessed real-time (unplanned) system asset outages impact on the mission, determined impact on the mission, and made or recommended decision.
03	Yes/No	Unit was familiar with system asset capabilities and limitations.
04	Yes/No	For recommendations, relevant readiness information was disseminated to the right person, at the right time, in a usable format, to facilitate situational understanding and decisionmaking.

05	Time	To respond to reports of outages and degradation.
06	Time	To identify asset status changes and take appropriate action to minimize degrading effects or maximize enhancement of that change on the overall system capabilities.
07	Time	Change in asset status for which it was not accounted.
08	Number	Of maintenance, test, and exercise operations adversely affected by disapprovals.
09	Number	Of incidents of critical asset information not reaching the person responsible for a decision in a timely manner.
