

### ART 6.2.3.1 Conduct Unassisted Personnel Recovery

Conduct unassisted PR to achieve own recovery without outside assistance. An unassisted recovery typically involves an evasion effort by IMDC personnel in order to get back to friendly forces, or to a point where they can be recovered via another method. While the code of conduct requires IMDC personnel to make every effort to evade or escape, commanders must strive to recover these personnel via one or a combination of the other methods.

<b>NO.</b>	<b>Scale</b>	<b>Measure</b>
01	Yes/No	Planning system enforced to provide timely reporting; unit accurately reported validation and determined location; and unit rapidly disseminated the information to the entire PR architecture for coordinated response.
02	Yes/No	The system provided for accurate record keeping without degrading the PR effort.
03	Yes/No	The primary mission continued parallel to the recovery effort.
