

ART 3.3 Integrate Air-Ground Operations

Integrating air-ground operations requires continuous coordination between the air and land commanders. It requires interfacing with the appropriate joint air operations center or combined air operations center to exchange current intelligence and operational data, support requirements, and coordinate Army forces' requirements for airspace coordinating measures, fire support coordination measures, and theater airlift. (ATTP 3-09.13) (USAFAS)

| NO. | Scale | Measure |
|------------|--------------|--|
| 01 | Yes/No | Unit established liaison. |
| 02 | Yes/No | Unit used information systems and collaborative tools to establish liaison. |
| 03 | Yes/No | Unit processed operation orders, fragmentary orders, situational reports, mission reports, and flight reports to obtain and pass pertinent operations and intelligence information between the land component and the air component. |
| 04 | Yes/No | Unit maintained current theater-level fire support and airspace picture. |
| 05 | Yes/No | Unit coordinated the establishment and updating of airspace coordinating measures and fire support coordination measures between the land component and air component. |
| 06 | Yes/No | Unit coordinated air component commander requests for Army forces (ARFOR) and land component assets. |
| 07 | Yes/No | Unit coordinated ARFOR and land component requirements for theater airlift with the joint force commander, including the joint movement center deployment and distribution operation center. |
| 08 | Yes/No | Unit coordinated for ARFOR and land component support during joint search and rescue operations. |
| 09 | Yes/No | Unit coordinated with ARFOR and land component to react to the launch of a theater ballistic missile. |
| 10 | Yes/No | Unit provided operations and intelligence information to ground liaison detachments and aerial reconnaissance liaison officer support detachments. |
