MEMORANDUM FOR U.S. Army Training Support Center, Army Training
Modernization Directorate (ATSC-STIDD), Fort Eustis, VA 23604-5166

SUBJECT: System Training Plan (STRAP) for the Family of Power Utility Kits (FoPUK)
Increment: 1

1. The purpose of this memorandum is to request a waiver of the requirement to develop a STRAP for the FoPUK
2. The FoPUK is modernizing and combining current tool kits. These kits have already been established as past programs of record (PORs). However many have become obsolete. Currently, modernized tools within the kits are being acquired and trained at the institution and unit levels. The tool kits are not formally established in the Army acquisition system with a valid NSN and only have commercial off the shelf (COTS) manuals to accompany them. Training will not significantly change with the fielding of the FoPUK.
3. Unit training with the FoPUK may require operator New Equipment Training. No additional training devices or materials are required. MSCoE will validate all technical manuals prior to the first unit being equipped with the system. Overall unit sustainment training time will not increase.
4. Instructor and Key Personnel Training (IKPT) may be required.
3. POC for this action is James Abrahamson, CDID/RDD-AM/STID-T, DSN 676-7752 or commercial 573-563-7752. The e-mail address is james.a.abrahamson.civ@mail.mil.

FOR THE COMMANDANT:

Encl
Family of Power Utility
Kits (FoPUK) Increment: 1 CPD
