

TM 3-34.49

Water-Well Drilling Operations

This publication's nomenclature superseded FM 3-34.469 dated December 2008 under the Doctrine 2015 guidelines. The US Navy is the lead proponent and has made an administrative note to that effect, however, the cover page still reflects the FM nomenclature. To access this Multi-Service document please click on the link below to the Navy Doctrine Library System (NDLS). Once there you will need to search "TM 3-34.49" in the upper right corner search box to bring up the document.
