

ART 5.3 Conduct Knowledge Management and Information Management

Staffs apply the science of control to support the commander's tasks by conducting knowledge management and information management. Knowledge management is the art of creating, organizing, applying, and transferring knowledge to facilitate situational understanding and decisionmaking.

Information management is the science of using procedures and information systems to collect, process, store, display, disseminate, and protect knowledge products, data, and information. (USACAC)

Note: Knowledge management supports improving organizational learning, innovation, and performance. Information management disseminates timely and protects relevant information to commanders and staffs. Information management helps commanders develop situational understanding.

NO.	Scale	Measure
-----	-------	---------

Supporting Collective Tasks:

Task No.	Title	Proponent	Echelon
