

ART 4.3.1.2 Provide Hospitalization

Hospitalization resources are medical treatment facilities capable of providing inpatient care and services. Hospitalization continues the medical care provided at roles 1 and 2 of the Army Health System. It also provides a far forward surgical capability that provides essential care in theater, outpatient services, and ancillary support (pharmacy, clinical laboratory, radiology services, and nutrition care). Within theater, the hospitalization capability includes returning those patients to duty within the limits of the theater evacuation policy. This conserves the fighting strength by returning trained manpower to the tactical commander. It also provides stabilizing care to facilitate the evacuation of those patients who will not recover from their injuries or illnesses within the stated theater evacuation policy to facilities capable of providing required care. Theater hospitals may be augmented with hospital augmentation teams to provide specific specialty care.

NO.	Scale	Measure
01	Yes/No	Number of beds and services available in the AO was equal to or greater than the peak demand for these services.
02	Time	To refine hospital operations program for AO after receipt of warning order.
03	Time	To reach full functionality after activation of AO.
04	Percent	Difference between planned hospitalization requirements and actual requirements in AO.
05	Percent	Difference between hospitalization capacity realized and planned hospitalized capacity.
06	Percent	Of casualties per day in AO that require hospitalization.
07	Percent	Of hospital beds in AO utilized per month.
08	Percent	Of hospitalized patients who require further medical care outside the AO or in CONUS.
09	Percent	Of patients returning to duty from the hospital within the theater evacuation policy.
10	Percent	Of patients requiring radiology services.
11	Percent	Of patients requiring routine pharmacy support.
12	Percent	Of patients requiring specialized formulary pharmacy support.

13	Percent	Of patients requiring surgical care.
14	Percent	Of patients requiring inpatient medical care.
15	Percent	Of patients requiring renal hemodialysis (when augmented).
16	Percent	Of patients requiring support from special care team (when augmented to provide humanitarian assistance, disaster relief, or support to other stability or civil support operations).
17	Percent	Of hospital minimal care patients exceeding organic minimal care capabilities (minimal care capability augmentation required).
18	Percent	Of patients requiring head and neck surgical support (when augmented).
19	Percent	Of patients requiring infectious disease investigative and consultation services (when augmented).
20	Percent	Of patients requiring enhanced anatomic pathology, chemistry, and microbiology support (when augmented).
21	Percent	Difference between actual nutrition care support requirements in AO and planned nutrition care support.
22	Number	Of outpatient visits completed in a month.
23	Number	Of casualties per day in AO who require hospitalization.
24	Number	Of patients requiring special diets.
25	Number	Of supported units or personnel provided training in the Army health promotion program.
26	Number	Of cases requiring telemedicine support (when augmented).
27	Percent	Of totally of medically treated persons that are enemy prisoners of war and detained and retained personnel.
28	Percent	Of patients treated for mild traumatic brain injury.
29	Percent	Of patient encounters recorded in individual health and/or electronic medical record.
30	Percent	Of patients treated by a forward surgical team
