

ART 6.9.4.2.3 Process Contaminated Remains

Contaminated human remains of US personnel must be effectively decontaminated. These procedures minimize the risk of personnel who come into contact with the human remains. This process begins at determination of contamination of the remains through decontamination of the remains. Special attention should be paid to safety and sanitation. (FM 4-20.64) (USACBRNS)

NO.	Scale	Measure
01	Yes/No	Unit established mass mortuary operations in a weapons of mass destruction environment.
02	Yes/No	Unit collected contaminated human remains.
03	Yes/No	Unit ensured procedures existed for chain of actions associated with contaminated human remains processing.
04	Yes/No	Unit ensured procedures adequately addressed the safe recovery and handling, packaging, marking, decontamination, processing, storage, and preparation for transport of remains and personal effects.
