

## ART 2.3.1 Perform Intelligence, Surveillance, and Reconnaissance Synchronization

Intelligence, surveillance, and reconnaissance synchronization is the task that accomplishes the following: analyzes information requirements and intelligence gaps; evaluates available assets internal and external to the organization; determines gaps in the use of those assets; recommends intelligence, surveillance, and reconnaissance (ISR) assets controlled by the organization to collect on the commander's critical information requirements; and submits requests for information for adjacent and higher collection support. (FM 3-0) (USACAC)

Note: This task ensures that ISR, intelligence reach, and requests for information successfully report, produce, and disseminate information, combat information, and intelligence to support decision making. The intelligence officer, in coordination with the operations officer and other staff elements as required, synchronizes the entire collection effort. This effort includes assets the commander controls and those of adjacent and higher echelon units and organizations. It also uses intelligence reach to answer the commander's critical information requirements (CCIRs) and other requirements.

NO.	Scale	Measure
01	Yes/No	Unit accomplished ISR synchronization by developing a strategy to answer each priority intelligence requirement (PIR).
02	Yes/No	Unit developed requirements that supported the commander's decisionmaking.
03	Yes/No	Unit determined unique support requirements for ISR assets to include maintenance, crew training, downlink nodes, access, and connectivity.
04	Yes/No	Unit determined scheme of support requirements including fires, routes of movement and maneuver, medical and casualty evacuation, and sustainment.
05	Yes/No	Unit developed and provided ISR task organization recommendations to the operations officer.
06	Yes/No	Unit satisfied CCIRs using intelligence reach and through the request for information (RFI) process.
07	Yes/No	Unit submitted requests for information to satisfy CCIRs

		that the commander lacks the organic assets to answer.
08	Yes/No	Unit requested collection, products, or dissemination from higher headquarters, adjacent units, or multinational partners to facilitate ISR operations.
09	Yes/No	Unit evaluated each requirement for completion based on reported information.
10	Yes/No	Unit delivered the ISR synchronization plan to the operations officer.
11	Yes/No	Unit accomplished ISR synchronization by developing a strategy to answer each PIR.
12	Yes/No	Unit developed requirements that supported the commander's decisionmaking.
13	Percent	Of commander's requirements answered through intelligence reach and through the RFI process.
14	Percent	Of commander's requirements answered through requests for information and through collection, production, or dissemination from higher headquarters.
