

ART 3.2.4 Conduct Meteorological Operations

Conduct meteorological operations to enhance accuracy of indirect fires, downwind predictions, intelligence preparation of the battlefield, and forecast capabilities. Employ meteorological measuring instruments to determine necessary adjustments to individual weapon firing tables. Determine current atmospheric conditions that effect firing units. Distribute meteorological data as required. (FM 3-09.15) (USAFAS)

NO.	Scale	Measure
01	Yes/No	Unit completed meteorological operations by time specified in order.
02	Yes/No	Operation plan or operation order detailed the frequency of meteorological observations.
03	Yes/No	Meteorological data was obtained from other approved sources when organic meteorological measuring capabilities were not available.
04	Time	To prepare for meteorological operations.
05	Time	To execute meteorological operations.
06	Time	From requesting information to providing desired meteorological information to units for firing operations.
07	Percent	Of meteorological measurement systems operational.
08	Number	Of improved positioning and azimuth determining systems available.
09	Number	Of meteorological measurement systems operational.

Supporting Collective Tasks:

Task No.	Title	Proponent	Echelon
06-4-3015	Emplace a Meteorological (MET) Section	06 - Field Artillery (Collective)	Section
06-4-5425	Provide Meteorological (MET) Support	06 - Field Artillery (Collective)	Section
06-6-	Coordinate Meteorological Operations	06 - Field	Brigade

5429		Artillery (Collective)
