

## ART 6.9.4.2.1 Conduct Emergency Medical Treatment of Contaminated Personnel

To evaluate and properly treat contaminated personnel, they must be triaged, decontaminated, and classified to the type and seriousness of illness or injury. Medical management of contaminated casualties includes triage, basic medical treatment, decontamination, emergency medical treatment, advanced trauma management, evacuation, and continually protect them from the chemical, biological, radiological, and nuclear elements. (FM 4-02.7) (USACBRNS)

NO.	Scale	Measure
01	Yes/No	Unit established a patient decontamination site.
02	Yes/No	Unit accomplished initial triage, emergency medical treatment, and decontamination on the dirty side of the hot line.
03	Yes/No	Unit rendered life-sustaining care, as required, without regard to contamination.
04	Yes/No	Unit accomplished secondary triage, advanced trauma management, and patient disposition on the clean side of the hot line.
05	Yes/No	When applicable, unit implemented isolation and quarantine plans and procedures.
06	Percent	Of patients requiring decontamination before receiving medical treatment.
07	Percent	Of medical treatments degraded, delayed, or modified due to the inability to perform patient decontamination.
