

Summary Report for Individual Task
031-627-3042
Coordinate Technical Support With External Agencies for CBRN Response
Status: Approved

Distribution Restriction: Approved for public release; distribution is unlimited.

Destruction Notice: None

Foreign Disclosure: FD5 - This product/publication has been reviewed by the product developers in coordination with the USACBRNS, Foreign disclosure representative and MSCoE foreign disclosure authority. This product is releasable to students from all requesting foreign countries without restrictions.

Condition: You are a CBRN staff officer in a CBRN cell. A CBRN incident has taken place at a Continental United States (CONUS) location. The Federal Emergency Management Agency (FEMA) is the lead federal agency (LFA) for domestic consequence management (CM) operations. In order with the Federal Response Plan (FRP), FEMA has called upon the Department of Defense (DoD) to provide CM support for this incident. Given FM 3-11.21 and FM 3-11.5, you must coordinate technical support with external government and civilian agencies. This task should not be trained in MOPP 4.

Standard: Coordinate technical support with external agencies for CBRN response by doing ALL of the following:
-Establishing link-up times and locations for staging area operations or operational updates with the incident commander (IC)
-Issuing warning order (WARNO) to responding units to report to the incident command post (ICP)
-Identifying and assigning tasks according to the incident requirements and the level of training of the responding unit
- Coordinating for logistic.

Special Condition: None

Safety Risk: Low

MOPP 4: Never

Task Statements

Cue: None

DANGER
None

WARNING
None

CAUTION
None

Remarks: None

Notes: None

Performance Steps

1. Coordinate link-up times and locations for staging area operations or operational updates with the incident commander (IC).
2. Issue WARNO to responding units to report to the incident command post (ICP).
3. Identify and assign tasks according to the incident requirements and the level of training of the responding unit.
 - a. Detect
 - b. Assess
 - c. Containment support
4. Coordinate for logistics.
 - a. Plan the movement and sustainment of forces for CBRN CM operations. Logistic activities that may be conducted by response elements include:
 - (1) Prepositioning materials
 - (2) Transporting casualties, remains, and samples
 - (3) Deploying personnel and material
 - (4) Maintaining facilities and material.
 - b. Prioritize the movement of CBRN CM response units.
 - c. Phase the movement of CBRN CM response units so transportation capabilities are not overwhelmed.

(Asterisks indicates a leader performance step.)

Evaluation Guidance: Score the Soldier GO if all performance measures are passed (P). Score the Soldier NO-GO if any performance measure is failed (F). If the Soldier scores NO-GO, show the Soldier what was done wrong and how to do it correctly.

Evaluation Preparation: Setup: Evaluate this task during a field exercise or during a normal training session. Gather all equipment and materials listed in the condition statement. Develop several sets of scenarios for testing purposes. Use approved simulants, devices, or sources to simulate contamination.

Brief Soldier: A CBRN incident has taken place at a Continental United States (CONUS) location. The Federal Emergency Management Agency (FEMA) is the lead federal agency (LFA) for domestic consequence management (CM) operations. FEMA has called upon the Department of Defense (DoD) to provide CM support. You must coordinate technical support with external government and civilian agencies.

PERFORMANCE MEASURES	GO	NO-GO	N/A
1. Coordinated link-up times and locations for staging area operations or operational updates with the incident commander (IC).			
2. Issued WARNO to responding units to report to the incident command post (ICP).			
3. Identified and assigned tasks according to the incident requirements and the level of training of the responding unit.			
4. Coordinated for logistics.			
a. Planned the movement and sustainment of forces for CBRN CM operations.			
b. Prioritized the movement of CBRN CM response units.			
c. Phased the movement of CBRN CM response units so transportation capabilities were not overwhelmed.

	FM 3-11	Multiservice Doctrine for Chemical, Biological, Radiological, and Nuclear Operations	Yes	No
	FM 3-11.21	Multiservice Tactics, Techniques, and Procedures for Chemical, Biological, Radiological, and Nuclear Consequence Management Operations	Yes	No

Environment: Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to FM 3-34.5 Environmental Considerations and GTA 05-08-002 ENVIRONMENTAL-RELATED RISK ASSESSMENT. Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to FM 3-34.5 Environmental Considerations and GTA 05-08-002 Environmental-Related Risk Assessment.

Safety: In a training environment, leaders must perform a risk assessment in accordance with ATP 5-19, Risk Management. Leaders will complete the current Deliberate Risk Assessment Worksheet in accordance with the TRADOC Safety Officer during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW FM 3-11.4, Multiservice Tactics, Techniques, and Procedures for Nuclear, Biological, and Chemical (NBC) Protection, FM 3-11.5, Multiservice Tactics, Techniques, and Procedures for Chemical, Biological, Radiological, and Nuclear Decontamination. Everyone is responsible for safety. A thorough risk assessment must be completed prior to every mission or operation.
