

ART 3.0 The Fires Warfighting Function

The fires warfighting function is the related tasks and systems that provide collective and coordinated use of Army indirect fires and joint fires through the targeting process. It includes tasks associated with integrating and synchronizing the effects of these types of fires with the effects of other warfighting functions. Commanders integrate these tasks into the concept of operations during planning and adjust them based on the targeting guidance. Fires normally contribute to the overall effect of maneuver, but commanders may use them separately for decisive and shaping operations. (FM 3-0) (USACAC)

Note: ART 5.1.1.4 (Conduct Fires Planning) addresses planning for fires conducted during the operations process. ART 5.1.4.3 (Provide Combat Assessment) addresses combat assessment (Battle damage assessment, munitions effects assessments, and reattack recommendation).

NO.	Scale	Measure
