

ART 6.7 Enhance Protection

ART 6.7 is a concept that includes all aspects of protecting personnel, weapons, and supplies while simultaneously deceiving the enemy. Survivability tactics include building a good defense; employing frequent movement; using concealment, deception, and camouflage; and constructing fighting and protective positions for both individuals and equipment. Included are those assessments and surveys completed as a part of focused engineer reconnaissance support that includes infrastructure reconnaissance. (See FM 3-34.170.) Survivability operations are the development and construction of protective positions, such as earth berms, dug-in positions, overhead protection, and countersurveillance means, to reduce the effectiveness of enemy weapon systems.(FM 5-103) (USAES)

NO.	Scale	Measure
01	Yes/No	Unit could continue to conduct operations.
02	Yes/No	Unit losses from hazards were at acceptable levels.
03	Yes/No	Unit could determine when contaminated area was at a level with acceptable risk.
04	Yes/No	Unit performed risk assessment of all areas in the AO that underwent chemical, biological, radiological, and nuclear (CBRN) weapons attack.
05	Time	Required to conduct an area reconnaissance.
06	Time	To determine that unit has been attacked by CBRN weapons.
07	Time	To predict downwind hazard from the use of CBRN weapons.
08	Time	To disseminate hazard information to all units in the AO and appropriate headquarters and agencies outside the AO.
09	Time	To harden unit equipment, facilities, and positions.
10	Time	To acquire equipment and supplies necessary to harden a unit or installation.
11	Percent	Of U.S. military and civilian casualties.
12	Percent	Increase in the time it takes the unit to conduct its operations due to the need to protect against identified hazards.
13	Percent	Of unit that has completed risk management and safety

		training.
14	Percent	Of friendly casualties due to failure to report the existence of hazards.
15	Percent	Of on-hand, mission-capable equipment that is necessary to protect the unit against hazards.
16	Percent	Of on-hand supplies necessary to protect the unit against hazards.
17	Percent	Of planned fighting positions completed.
18	Percent	Of planned protective positions completed.
19	Number	Of planned fighting positions completed.
20	Number	Of planned protective positions completed.
21	Number	And types of on-hand equipment necessary to protect the unit against hazards.
22	Number	And types of friendly equipment destroyed or damaged by enemy action.
23	Number	Of incidents of damage to units and facilities in the AO that impact the commander's concept of operations.
24	Number	Of U.S. military and civilian casualties due to enemy hazards.
