

## ART 2.0 The Intelligence Warfighting Function

The intelligence warfighting function is the related tasks and systems that facilitate understanding of the operational environment, enemy, terrain, and civil considerations. It includes tasks associated with intelligence, surveillance, and reconnaissance operations, and is driven by the commander. Intelligence is more than just collection. As a continuous process, it involves analyzing information from all sources (human, imagery, measurement and signature, signal) and conducting operations to develop the situation. (FM 3-0) (USACAC)
