

ART 1.1 Perform Tactical Actions Associated with Force Projection and Deployment

Force projection is the military element of national power that systemically and rapidly moves military forces in response to requirements of full spectrum operations. Force projection demonstrates the ability of the nation to alert, mobilize, and rapidly deploy combat forces and sustainment units (regular Army, the Army National Guard/Army National Guard of the United States, and the United States Army Reserve forces) to operate effectively anywhere in the world. The ability to rapidly deploy Army forces with sufficient depth and strength to sustain multiple, simultaneous operations contributes to mission accomplishment. (FM 3-35) (CASCOM)
