

081-68W-2003
Manage a Combat Lifesaver Program
Status: Approved

Security Classification: U - Unclassified

Distribution Restriction: Approved for public release; distribution is unlimited.

Destruction Notice: None

Foreign Disclosure: FD2 - This training product has been reviewed by the training developers in coordination with the Joint Base San Antonio, Fort Sam Houston/US Army Medical Center of Excellence (MEDCoE) foreign disclosure officer. This training product can be used to instruct international military students when the country meets specific criteria. Specify requirement(s) that each country must meet (select all that are appropriate): 1) Must purchase equipment through FMS Not Applicable; 2) Must be a member of a specific group or coalition Joint Security Cooperation Education and Training Standards; AR12-15, SECNAVINST 4950.4B and AFI 16-105; 3) Must have an accepted clearance (must be authorized under an identified general security agreement with the US); 4) May

not attend FD3 modules Not Applicable ; 5) Other Must have an accepted clearance and identified under a general security agreement with the United States.

Conditions: In an operational environment. You are required to manage a combat lifesaver (CLS) program. You are provided with Medical Equipment Set, Combat Lifesaver, Version 2005, UA 245A pen, a clipboard, a notepad, Deliberate Risk Assessment Worksheet. This task should not be trained in MOPP 4.

Standards: Manage the CLS program in accordance with (IAW) AR 350-1 Army Training and Leader Development, while adhering to all warnings, and cautions, without error, using the task GO/NO GO checklist.

Special Conditions: None

Safety Risk: Low

MOPP 4: Never

Task Statements

Cue: None

DANGER

None

WARNING

None

CAUTION

All body fluids should be considered potentially infectious so always observe body substance isolation (BSI) precautions by wearing gloves and eye protection as a minimal standard of protection.

Remarks: None

Notes: None

Performance Steps

1. Research requirements required to conduct the CLS program IAW AR 350-1 and local SOPs.
2. Annotate training on the unit training calendar.
3. Review course material and content to ensure it is current.
4. Submit the DA Form 1687 to order supplies and course equipment prior to the start of the course.
5. Identify the number of personnel that need to be trained and certified.
6. Submit the DA Form 1687 to request medical equipment and supplies in support of training.

Note: Send DA Form 1687 (Notice of Delegation of Authority-Receipt for supplies) document by email to the Army Institute for Professional Development (AIPD) for processing: usarmy.jble.CAC.mbx.atssc-combat-lifesaver@mail.mil. Allow six weeks for processing and mailing of course materials.

7. Reserve the facilities for training.
8. Inspect the proper conditions and operability of training facilities, equipment, and systems.
9. Complete a DD Form 2977 IAW AR 385-10.
10. Ensure the instructors meet all qualifications.

Note: This course does not limit the number of retests that can be administered to a student on a failed examination. However, the Soldier must be allowed at least one retest on each examination. The course manager may establish a maximum number of retests or procedures for approving more than one retest per examination.

- a. Ensure the primary instructor at the division or brigade is a Senior Medical NCO and the primary instructor at the battalion is at least an E-6/SSG.
- b. Verify instructors are fully Military Occupational Specialty (MOS) qualified and have maintained the 68W (MOS) for a period of at least one year.
- c. Verify all instructors are Basic Life Support (BLS) certified.
- d. Verify an initial instructor evaluation was completed (by the Course Manager or Medical Director) No Later Than (NLT) 30 days prior to the start of instruction.
- e. Ensure each instructor has completed TC 8-800 (or equivalent) within the last twelve months.
- f. Ensure that all instructors are placed on additional duty orders.
- g. Ensure all instructors and assistant instructors (AI) are trained on equipment, course material and requirements.

11. Notify students of their selection to attend the Combat Life Savers (CLS) course at least two weeks prior to the start of instruction.

Note: To limit training time missed, ensure that students know to NOT schedule appointments during the course. The course is their place of duty, until course completion.

12. Ensure instructors and students comply with safety and environmental protection rules, regulation, laws, and course requirements.
13. Annotate students certifications will be completed and entered into Army Training Requirements and Resources System (ATTRS) by the instructing staff.
14. Submit a memorandum of completion to AIPD at the end of the course.
Note: Cover letter and completion roster need to be sent to: usarmy.jble.CAC.mbx.atssc-combat-lifesaver@mail.mil.
15. Monitor annual re-certification requirements and training as needed.
Note: Field training exercise and deployment training are perfect times for Combat Casualty Responders to use the skills taught throughout the course to maintain skill proficiency. On the battlefield is not the time to try and remember how to save a Soldier's life.
16. Update certification and recertification of trained personnel in the Digital Training Management System (DTMS) or local training records.
17. Brief command leadership on trained personnel and mission requirements as needed.

(Asterisks indicates a leader performance step.)

Evaluation Guidance: Score each Soldier according to the performance measures in the evaluation guide. Unless otherwise stated in the task summary, the Soldier must pass all performance measures to be scored GO. If the Soldier fails any step, show what was done wrong and how to do it correctly.

Evaluation Preparation: You must evaluate the Soldier on their performance of this task in an operational condition related to the actual task.

PERFORMANCE MEASURES	GO	NO-GO	N/A
1. Researched requirements required to conduct the CLS program IAW AR 350-1 and local SOPs.			
2. Annotated training on the unit training calendar.			
3. Reviewed course material and content to ensure it is current.			
4. Submitted the DA Form 1687 to order supplies and course equipment prior to the start of the course.			
5. Identified the number of personnel that need to be trained and certified.			
6. Submitted the DA Form 1687 to request medical equipment and supplies in support of training.			
7. Reserved the facilities for training.			
8. Inspected the proper conditions and operability of training facilities, equipment, and systems.			
9. Completed a DD Form 2977 IAW AR 385-10.			
10. Ensured the instructors meet all qualifications.			
11. Notified students of their selection to attend the BLS course at least two weeks prior to the start of instruction.			
12. Ensured instructors and students comply with safety and environmental protection rules, regulation, laws, and course requirements.			
13. Annotated student certification completion in Army Training Requirements and Resources System (ATTRS).			
14. Submitted a memorandum of completion to AIPD at the end of the course.			
15. Monitored annual re-certification requirements and training as needed.			
16. Updated certification and recertification of trained personnel in the Digital Training Management System (DTMS) or local training records.			
17. Briefed command leadership on trained personnel and mission requirements as needed.

Environment: Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to the current Environmental Considerations manual and the current GTA Environmental-related Risk Assessment card.

Safety: In a training environment, leaders must perform a risk assessment in accordance with current Risk Management Doctrine. Leaders will complete the current Deliberate Risk Assessment Worksheet in accordance with the TRADOC Safety Officer during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW current CBRN doctrine.

Prerequisite Individual Tasks : None

Supporting Individual Tasks : None

Supported Individual Tasks : None

Supported Collective Tasks : None

Knowledges :

Knowledge ID	Knowledge Name
K0533	Knowledge of Composite Risk Management
081-TI-CMN-0246	Know unit requirements for number of combat lifesavers.
K060	Army Training Management System (ATMS)
081-FD-70E-1072	"Define risk management"
081-TI-CMN-0251	Know how and when to conduct combat lifesaver recertification training.
081-TI-CMN-0249	Know how to obtain equipment/supplies for combat lifesaver training.

Skills :

Skill ID	Skill Name
S2573	Ability to identify refresher training requirements
101-S-1004	Ability to Conduct an Inventory
S0626	Describing the training requirements.
101-S-M008	Ability to acquire materials, equipment and support.
S0322	Coordinating for resources support
