

## Toolkit examples

Every toolkit is designed for a specific purpose and group of users.

Some are designed for individuals and others are designed for use by teams of people.

All toolkits are used with colored markers and scissors so that the users can draw their own images and cut their own shapes.

Examples in subsequent slides:

1. Individual toolkit for expressing the PC gaming experience: past, present and future.
2. Group toolkit for exploring the future of the built environment.
3. Family toolkit for exploring the future of the home experience.
4. Small group toolkit for exploring the future patient room.
5. Team toolkit for exploring future scenarios of food and eating.
6. Action shot with a group toolkit.
7. Group toolkit used by nurses to explore the future hospital patient floor.
8. Three –dimensional Velcro-modeling toolkit
9. Three-dimensional toolkit for exploring future hospital spaces
