

**Summary Report for Individual Task
150-718-5315
Establish the Common Operational Picture
Status: Approved**

DISTRIBUTION RESTRICTION: Approved for public release; distribution is unlimited.

DESTRUCTION NOTICE: None

Condition: The command has received an operations plan, or warning, operations, or fragmentary order from higher headquarters and is exercising mission command. The commander has issued guidance on establishing the common operational picture. The command has established communications with subordinate and adjacent units, and higher headquarters. The mission command system is operational and processing information in accordance with standard operating procedures. This task can be performed in hours of daylight or limited visibility in various environment conditions. The unit has received guidance on the rules of engagement. Some iterations of this task should be performed in MOPP.

Standard: The staff officer processed relevant information in contrast to information requirements in the commander's area of interest in order to provide the commander and subordinates with an understandable common operational picture. The end-state is a shared situational awareness and common situational understanding of the operational environment that allows for timely decisions and exercise of mission command.

Note: Task steps and performance measures may not apply to every staff, unit or echelon. Prior to evaluation, coordination should be made between evaluator and the evaluated staffs or units' higher headquarters to determine the performance measures that may not be evaluated.

DANGER

Leaders have an inherent responsibility to conduct Composite Risk Management to ensure the safety of all Soldiers and promote mission accomplishment.

WARNING

Composite Risk Management is the Army's primary decision-making process to identify hazards, reduce risk, and prevent both accidental and tactical loss. All soldiers have the responsibility to learn and understand the risks associated with this task.

CAUTION

Identifying hazards and controlling risks across the full spectrum of Army functions, operations, and activities is the responsibility of all Soldiers.

Remarks: Task content last updated: 20 January 2012

Notes: The term "staff officer" refers to any individual member of a staff section (Officer, Warrant Officer, or Noncommissioned Officer) that is responsible for conducting the task action or generating the product required by the task in the absence of the principal staff officer.

Performance Steps

1. The staff officer, in coordination with the knowledge management section, analyzes and evaluates information in order to tailor the knowledge management plan and provide knowledge.

Note: Knowledge: Information analyzed to provide meaning and value or evaluated as to implications for the operation. It is also comprehension gained through study, experience, practice, and human interaction that provides the basis for expertise and skilled judgment.

a. Recommends changes to the knowledge management plan as needed.

b. Coordinates the knowledge management plan with the information management plan developed by G-6/S-6.

c. Develops file and data management procedures that incorporate the most recent and effective standards to enhance search and retrieval capabilities.

2. The staff officer confirms integration of analog and digital information inputs into the common operational picture (COP).

Note: Common Operational Picture: A single display of relevant information within a commander's area of interest tailored to the user's requirements and based on common data and information shared by more than one command.

3. The staff officer facilitates the collaboration and timely sharing of relevant information (RI):

a. Support the implementation of the command information management plan in the command post (CP) based on the commanders' guidance.

b. Establish procedures that enable and maintain the timely flow of RI.

c. Establish information systems to support the flow of RI and development of the COP.

d. Coordinate the staff interaction necessary to develop the COP within the CP.

e. Provide the architecture necessary to collect, process, display, store, and disseminate RI to support command and control functions.

4. The staff officer conducts information management in accordance with (IAW) the tactical standing operating procedure (TACSOP), to collect, process, store, display, and disseminate information:

a. Collect data using available analog and/or mission command (MC) systems.

b. Process data by transforming it into information and knowledge to create the COP:

(1) Process the data IAW the TACSOP.

(2) Integrate multiple bits of data to make useable information in order to reduce the volume of data.

(3) Assess the quality of information for:

(a) Accuracy; The extent to which the information conveys the true situation, the degree to which it is fact.

(b) Timeliness; The extent to which the information still reflects reality. Timely information has not overtaken by events.

(c) Usability; The extent to which the information is easily understood or displayed in a format that immediately conveys the meaning.

(d) Completeness; The extent to which the information contains all necessary components.

(e) Precision; The extent to which the information has the required level of detail, no more and no less.

(f) Reliability; The extent to which the information is trustworthy, uncorrupted, and undistorted.

(4) Apply judgment to transform information into understanding.

(5) Categorize RI using the factors of mission, enemy, terrain and weather, troops and support available-time available and civil considerations (METT-TC).

c. Store RI in databases.

d. Disseminate the COP to higher, joint, coalition, adjacent, subordinate, supported, and supporting organizations.

5. The staff officer provides RI to the commander and others in a usable form as prescribed in the TACSOP to facilitate situational understanding and decision making:

a. Maintain a running estimate focused on the mission, commander's intent and the factors of METT-TC.

b. Monitor ongoing operations to identify RI from variances, in their respective functional area between the current situation versus the planned situation.

c. Inform and advise the commander and staff concerning all RI pertaining to their related warfighting functional responsibilities, specifically addressing:

(1) Capabilities, limitations, requirements, availability, and employment of resources.

(2) Directives and policy guidance from higher headquarters.

(3) Producing reports, overlays, matrices, decision aids, and other decision making tools IAW the TACSOP.

d. Evaluate RI based on the running estimate using METT-TC, in coordination with the mission and the commander's intent, to identify COP related information.

(Asterisks indicates a leader performance step.)

Evaluation Preparation: Score the Soldier: GO if all performance measures are passed. Score the Soldier NO-GO if Soldier fails any performance measure. If the Soldier scores NO-GO, show the Soldier what was done wrong and how to do it correctly.

PERFORMANCE MEASURES	GO	NO-GO	N/A
1. The staff officer in coordination with the knowledge management section analyzed and evaluated information in order to tailor the knowledge management plan and provide knowledge.			
a. Recommended changes to the knowledge management plan as needed.			
b. Coordinated the knowledge management plan with the information management plan developed by G-6/S-6.			
c. Developed file and data management procedures that incorporated the most recent and effective standards to enhance search and retrieval capabilities.			
2. The staff officer confirmed integration of analog and digital information inputs into the common operational picture (COP).			
3. The staff officer facilitated the collaboration and timely sharing of relevant information (RI):			
a. Supported the implementation of the command information management plan in the command post (CP) based on the commanders' guidance.			
b. Established procedures that enable and maintain the timely flow of RI.			
c. Established information systems to support the flow of RI and development of the COP.			
d. Coordinated the staff interaction necessary to develop the COP within the CP.			
e. Provided the architecture necessary to collect, process, display, store, and disseminate RI to support command and control functions.			
4. The staff officer conducted information management in accordance with the tactical standing operating procedure to collect, process, store, display, and disseminate information.			
a. Collected data using available analog and/or mission command systems.			
b. Processed data by transforming it into information and knowledge to create the COP:			
(1) Processed the data IAW the TACSOP.			
(2) Integrated multiple bits of data to make useable information in order to reduce the volume of data.			
(3) Assessed the quality of information for:			
(a) Accuracy; The extent to which the information conveys the true situation, the degree to which it is fact.			
(b) Timeliness; The extent to which the information still reflects reality. Timely information has not overtaken by events.			
(c) Usability; The extent to which the information is easily understood or displayed in a format that immediately conveys the meaning.

Environment: Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to FM 3-34.5 Environmental Considerations and GTA 05-08-002 ENVIRONMENTAL-RELATED RISK ASSESSMENT.

Safety: In a training environment, leaders must perform a risk assessment in accordance with FM 5-19, Composite Risk Management. Leaders will complete a DA Form 7566 COMPOSITE RISK MANAGEMENT WORKSHEET during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW FM 3-11.4, NBC Protection, FM 3-11.5, CBRN Decontamination. .
